Ms Carolyn Hewson AO
Dr Brian McNamee AO

I am happy to shoulder more tax responsibility, as it is essential to our quality of life here.

My I.P. Income comes from 8 Exclusive Global Licences, established during 1972-2014.

Presently, our current Tax Revenue and Governments' Spending are not sustainable.

Federal and States authorities have failed to husband properly our public resources:

A submission Re our public Financial System of Australia:

1. **collect a Revenue Based 3% Tax on every bank deposits**
2. **terminate** all financial entitlements to AUS industry
3. design & expense Budgets **independently** from the governing Party
4. **terminate states**
5. increase responsibilities of our **565 local governments**
6. **downsize Canberra**
7. establish public **Social Corporations** to run selected federal ministries
8. run Elections & major Legislation via **Electronics**

9. provide our **foreign aid** against 50% of Australia products and services

10. donate **aid** for adverse natural events worldwide.

Exporting

Exhibit under unified '**Stand Australia**' at int'l trade expos.

Control **foreign trade trips** of public officials.

Trading

Family Company, and its profit-risk, is none of the government business.

Public Companies are already governed by their shareholders and the stock market.

Sharing

3% Tax on all our revenues, to be deducted from all banks.

On every account, held by a person, or by a company, in Australia or abroad.

No Cash Economy to be allowed.

Best Regards

Anti Kajlich
Owner & Director
