

Attn. Financial Services Inquiry

It is time for a broadening of the banking system to provide greater support for the Co-op system of banking.

The big four banks have gained too much with government support to the benefit of their shareholders, not the average Australian.

They have lost competition across the financial system and at the same time have increased their questionable practices.

Government support through policy, legislation and enforcement is needed to encourage alternatives to the big 4 and support Co-op banking that truly cares about people.

Yours sincerely
