

Dear Sirs or Madams,

I am just an ordinary Mum and Dad Family Australian Citizen, we really appreciate on behalf of the Australian Public in general what the government is doing in bringing these white collar thieves and criminals to account and transparency and justice for ripping off the public legally specially in all Areas where money is involved, banks, financial institution's, superannuation funds, and specially the gaming and the gambling industries. Everywhere you turn to there is a rip off situation going on for example in Telecommunications industries they charge exorbitant overinflated costs, in the use of the internet and text messages, fuel, electricity, and various energy forms and specially gambling industries like all the lotto's and poker machines in clubs and casinos who have a ball as a cash cow machine specially on return on investment for example there should be legally a return to the public for every dollar 85% return in general. This is just a few of the unorthodox practices that is going on in all sphere's of the finance industry where money is involved and generated. We are very thankful and appreciative what your enquiry is doing like a knights shining armour to save from these sharks. Keep up the good work.

Many thanks,

Kind regards,

Ed Shus
